Professional Summary

Program Manager with 14 years delivering enterprise-scale platform solutions and workflow automation in highly regulated financial environments. Proven expertise in independently leading full-cycle system rollouts covering front-office to mid-office business lines in a global financial institution—from global resource negotiation and cross-time zone planning to business requirements analysis, process optimization, and multi-system integration. Adept at translating complex business needs into technical solutions, driving rapid business adoption, and ensuring operational continuity through end-to-end governance. Direct COO reporting line with C-level stakeholder management, vendor governance, and regulatory compliance (PIPL + GDPR dual jurisdiction, zero incidents). Certified PMP and ITIL Foundation.

Work Experience

BPCE ES (Groupe BPCE, France) | IT PM

Nov 2022 – Present

Sole China IT PM reporting directly to COO, accountable for the full lifecycle of the global ONE Platform rollout covering front-office, mid-office, and back-office integration.

- **Full-cycle ownership: global ONE Platform rollout** — end-to-end managed the complete system lifecycle covering front-office and mid-office go-live, back-office integration. Independently drove global resource negotiation, cross-time zone delivery planning, and HQ alignment through change management to hypercare, achieving 100% business utilization within 2 months — first entity globally to complete full rollout; deployment model later adopted as global replicable template
- **Business domain mastery and process optimization** — rapidly absorbed end-to-end financial business workflows, identified process bottlenecks ahead of system configuration, and redesigned operations driving 70% operational cost reduction through workflow automation and process re-engineering
- **Business requirements analysis and translation** — partnered with business owners across departments to surface latent needs beneath surface-level requests, translating business language into precise technical specifications that solved real operational pain points; model adopted as global template
- **System integration and compliance** — owned all integration points between front, mid, and back offices ensuring cross-system data consistency and operational continuity; delivered PIPL compliance workstream with zero violations in 3+ years in regulated banking environment
